DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Perkins et al US Patent 6490173.

Regarding claim 1, Perkins et al discloses a device comprising a frame(element 10, Figs 1-6) provided with walls(element 20, Figs 1-6) and leg sections(element 12, Figs 1-6) extending from said walls, said device further comprising a printed circuit board (element 24, Figs 1-6) extending perpendicularly to said walls, wherein said leg sections extend through holes (element 34, Figs 1-6) in said printed circuit board and are connected to the printed circuit board by means of solder(column 4, lines 6-14, element

20,12, Figs 1-6), wherein at least one outer side wall of said frame is provided with at least one leg section which extends through a hole located in a part of said printed circuit board, which part extends through said outer side wall(elements 20,12,34 Figs 1-6).

Regarding claim 2, Perkins et al discloses wherein said outer side wall is provided with at least one cut-out part (see cut out parts in element 20, between elements 12, Figs 1-6), in which said leg section is located and through which the part of the printed circuit board extends.

Regarding claim 3, Perkins et al discloses wherein all outer side walls (elements 20 Figs 1-6) are provided with leg sections(elements 12 Figs 1-6) extending through holes located in parts of the printed circuit board(elements 34 Figs 1-6), which extend through said outer side walls.
